

Pioneer[®] brand 1132 is designed to:

- Help improve fermentation, retain nutrient content and enhance digestibility of ensiled corn silage
- Alter digestion rates of corn silage for improved feeding value

Available as a water-soluble product in packaging suitable for use in tank mixes or with Pioneer's Appli-Pro[®] Application Systems or as a free-flowing granular formulation for easy and convenient application.

1132 contains a unique blend of patented proprietary strains of *Lactobacillus plantarum* and *Enterococcus faecium* formulated to:

- Improve rate of corn silage digestion, even in processed corn silage
- Promote faster, more efficient fermentation
- Reduce dry matter losses

Available in Package Sizes:

Improves
Fermentation

Enhances
Bunklife

Improves Fiber
Digestibility

Relative Ratings * = Good; ** = Excellent; *** = Outstanding, NA = Not Applicable. **IMPORTANT:** Information and ratings are based on relative comparisons with other Pioneer[®] brand inoculants within each specific crop, not competitive products. Information and ratings are assigned by Pioneer Forage Additive Research, based on average performance across area of use under normal conditions, over a wide range of both environment and management conditions, and may not predict future results. Product responses are variable and subject to any number of environmental and management conditions. Please use this information as only part of your product positioning decision. Refer to www.pioneer.com/inoculants or contact a Pioneer sales professional for the latest and most complete listing of traits and scores for each Pioneer[®] brand product. **Fermentation** – rate and extent of pH decline and the composition of fermentation acids occurring in silage. **Bunklife** – relative heat development compared to ambient temperature. Bunklife considers both how quickly silage begins to heat and the amount of heat generated while remaining above ambient temperature. **Fiber Digestibility** – the digestibility of neutral detergent fiber (NDF) by the ruminant animal expressed as a percentage of the total NDF.
